

DualBox™

Two-in-one productivity

Revolutionising box production with the EMBA unique solution enabling double production capacity of RSC boxes:

$\text{TwinFeed}^{\text{TM}} + \text{XL Slotter} = \text{DualBox}^{\text{TM}} = 2x \text{ Output}$

$\text{TwinFeed}^{\text{TM}}$ is available for the EMBA 245 & 295 QS Ultima™, which feeds two identical shorter sheets in one single machine cycle.

The extended 4 shaft EMBA Magna XL VSC enables making all slots of both sheets in the slotting unit at speeds up to 30 000 boxes per hour – with no tolerance variations between the boxes. Like having two machines in one.

The DualBox™ innovation combined with the intelligent Ultima™ platform, unique Non-Crush Converting™ and Quick-Set™, makes EMBA 245 & 295 QS Ultima™ unbeatable. Converting knowledge into productivity.

To double your output: EMBA 245 & 295 QS Ultima™ with DualBox™
