

EMBA Ultima™. Innovation from the premier class supplier

# Keep the strength

**It continues.** The progressive evolution of EMBA's unique Ultima™ technology platform, combining outstanding production performance with dramatic savings in raw materials and energy.

The innovative and patented EMBA Non-Crush Converting™ technology eliminates nip points, preserving the geometry and strength of the corrugated profile throughout the entire converting process, creating significant savings in paper cost with higher BCT values for a much stronger product, and exciting productivity.

The intelligent Ultima™ technical platform is the result of focused collaboration with our customers, who recognize that high machine speed, optimized precision and low, predictable maintenance costs

are key requirements for any new Flexo Folder Gluer machine.

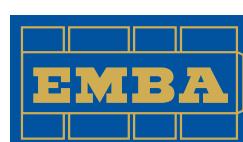

We will be happy to tell you everything you want to know about smart and competitive box production with EMBA Ultima™ intelligent technology.

EMBA's World first Non-Crush Converting™ technology, with the unique Ultima™ feed unit and the acknowledged Quick-Set™ feature, makes the EMBA Ultima™ unbeatable.

#### Available machines

- EMBA 175 QS Ultima™
- EMBA 215 QS Ultima™
- EMBA 245 QS Ultima™
- EMBA 295 QS Ultima™
